

Meera Iyer

meera.iyer@email.com | +91-99887-76655 | Hyderabad, India

Summary

Senior Data Scientist with 5+ years of experience building and deploying machine learning models in production, specializing in deep learning for demand forecasting and NLP. Strong track record of translating research into business impact.

Skills

Python, R, SQL, scikit-learn, TensorFlow, PyTorch, Pandas, NumPy, Statistics, Hypothesis Testing, AWS (SageMaker, S3, EC2), Docker, MLflow, Tableau, Power BI, NLP, Time Series Forecasting

Experience

Senior Data Scientist - GlobalRetail AI (Mar 2021 - Present)

- Led development of a deep learning (LSTM/TensorFlow) demand forecasting system deployed on AWS SageMaker, reducing inventory costs by 12% across 500+ stores.
- Built and deployed an NLP-based customer support ticket classifier (PyTorch, BERT) reducing manual triage time by 40%.
- Mentored 2 junior data scientists and established the team's MLOps practices using MLflow and Docker.

Data Scientist - HealthAnalytics Corp (Jun 2019 - Feb 2021)

- Developed patient readmission risk models (scikit-learn, XGBoost) achieving 0.85 AUC.
- Presented statistical analyses and model results to non-technical hospital administrators.

Education

M.Tech in Data Science, IIIT Hyderabad (2017-2019); B.Tech in Electronics, Anna University (2013-2017)

Certifications

AWS Certified Machine Learning - Specialty (2022)
